certificates**

Simply Vinci quality

Safety is of the utmost importance to us!

At Vinci Play, we have been taking care of the quality of manufactured playground equipment for almost 20 years, providing millions of children around the world with top-class entertainment and fun.

We subject production processes to detailed control, both in terms of aesthetics and safety of our products.

Our inventive designs stimulate children's unbridled curiosity, whilst encouraging them to play together. Millions of children play every day on Vinci Play playgrounds, built in more than 60 countries around the world.

Operating in the global market, we understand how important it is to consciously manage our social, environmental and organizational impacts. We listen carefully to our stakeholders, constantly look for new solutions and never lose sight of what is most important which is customer values.

Our professional approach makes us a reliable business partner for companies and institutions who are looking for a competent playground manufacturer. We are passionate about helping to create happy communities.

Quality Guarantee

Quality is the pillar of our company's activity. High standards, according to which we design play equipment, guarantees the best finish. We design playground equipment considering young users' individual needs, ensuring a high-class final product.

FSC CERTIFICATE

A certificate confirming our commitment to sustainable development. This mark informs about the specific origin of the wood, thus certifying that we are a company that takes a responsible approach when obtaining raw materials. Thanks to this, stakeholders are sure that we produce our products from pine and robinia wood by monitoring the supply chain. This means that the customer can trace the origin of the raw materials used to produce a given product, from the forest to the final product.

TÜV CERTIFICATES

We cooperate with certification bodies – TÜV Rheinland and TÜV SÜD, which test our products and issue certificates for their compliance with the relevant standards. These documents are proof that our priority is to care for quality and safety. For Vinci Play devices that do not yet have certificates, we issue declarations of conformity, proving that they meet the requirements of the EN 1176 standard. When choosing our equipment, consumers can be sure that it is trustworthy and maintains high quality and safety standards.

ENVIRONMENTAL MANAGEMENT SYSTEM

ISO 14001 is a standard regarding environmental management. Vinci Play, acting within its framework, takes care of environmental protection and responsible management of production processes. By implementing a specific environmental policy, our company minimizes the negative impact on the environment, being a transparent and socially responsible enterprise.

QUALITY MANAGEMENT SYSTEM

The international standard ISO 9001 defines the management of an organization according to precisely developed criteria. At Vinci Play, the quality management system compliant with the ISO 9001 standard is based on: understanding the customer, leadership, the implementation process and the involvement and improvement of the entire production. By acting in accordance with these principles, contractors are certain of the quality of manufactured products and the clarity of the entire production process.

SAFETY STANDARDS

EN 1176 is a whole spectrum of points and parameters related to playground equipment. The standards in this group define the requirements for the construction of the most harmless equipment possible, paying special attention to high safety standards for the youngest users, while providing them with conditions for development. At Vinci Play, the health and protection of children is of paramount importance for us, which is why we strive to safeguard the quality of our equipment. For products dedicated to young people and adults, such as workout and fitness, the relevant standard is EN 16630. In this case, as for playground equipment, the priority for us is both the functionality of the devices and their safety.

Long-term Warranty

The highest quality of our products is ensured by experienced specialists and high quality materials. That is why we can offer our customers a long-term guarantee of fault-free and fully safe use of our devices. We also provide post-warranty services. Orders for most spare parts are completed within 48 hours.

Selected warranty periods:

Year guarantee

Corrosion resistance of stainless steel and hot-dip galvanized and powder-coated steel elements, resistance to bark beetles and rotting of wooden structural elements.

Year guarantee

Structural strength of HDPE, 100% recycled HDPE and HPL elements; structural elements made of 100% recycled material (composite).

Year guarantee

Durability of steel and stainless steel structures of mobile devices; durability of Robinia wood structural elements.

Year guarantee

Durability of steel and stainless steel structural elements.

Spare parts

The high quality of our products translates into their exceptional durability and, with proper maintenance, long service life significantly exceeding the warranty period. We deliver maintenance instructions to ensure long-term use. However, individual materials naturally wear out or can be sometimes damaged. Therefore, we understand that the availability of spare parts and a quick response to vandalism-related problems is crucial to our customers being able to restore any damaged or worn-out components. We guarantee the availability of spare parts throughout the entire period of use and always provide support and advice on replacing and repairing devices. Orders for most spare parts are fulfilled within 48 hours. Spare parts or their equivalents are also available after the warranty has expired; we ensure their availability for up to 10 years.

Vinci Quality

What makes us unique

Advanced production processes! From design, through production, to shipping, at every stage our priorities are the highest quality and safety of the playground. In the production process we use only certified materials, and a multi-stage quality control system guarantees that all elements of the products that leave our production line meet strict safety standards. We employ the best specialists who ensure a high standard of production, reliable customer service and professional service of devices. Modern machinery and advanced production organization enables a quick 4-week order fulfillment. We are proud that thanks to the strict standards and quality safety procedures applied in our company, we can guarantee children, their parents or guardians carefree fun and relaxation on the playground.

Welding robots

Welding robots working on a set matrix built specifically for our needs, increase production efficiency thanks to the possibility of conducting welding processes in a continuous manner. The quality of welding joints is at the highest, always repeatable level thanks to the latest CMT technology. All robots work on high-class welding machines.

Wood cutting

CNC saws and industrial robots precisely cut and process the timber for the wooden parts of the playground. Beveling the edges of the wood removes sharp edges, and four-sided surface grinding prepares the wood for the impregnation process. The high quality of the wooden elements guarantees the safety of the devices, and the automation of the process allows for short production times and quick order fulfillment.

Hand made finish

Our experienced carpenters passionately hand-process and finish all wooden elements, and each piece of equipment is prepared individually. This process is complemented by modern 5D machining centers, which guarantees the details are precisely replicated. In this way, we achieve the highest quality of elements, fast implementation and high production efficiency.

Cutting and milling Robinia

A 5-axis machine for cutting and milling black locust wood is an excellent tool for precise production of even the most complex details. The work of the machinery park and robots, supplemented by meticulous manual work on surface grinding, allows us to achieve the best production effects of the Robinia series and a perfectly smooth wood surface.

Processing ropes

For the production of climbing devices and elements, bridges and interlacings, we use 16 mm thick steel ropes in polypropylene or nylon braiding. We connect them using durable fasteners made of plastic, stainless steel or aluminum. Rope elements are dimensioned, cut to the appropriate length and then forged using hydraulic presses with a pressure of 150 tons each.

Safety first

The playground, fitness and workout equipment manufactured by Vinci Play is characterized by a refined style, attention to detail and design in accordance to European safety standards. We subject all products to multi-stage verification with particular care before making them available, thanks to which we are sure that they are perfect, both visually and in the context of safety.

Versatile playgrounds for everyone

Our equipment is characterized by high versatility, thanks to which it is adapted to various needs - the size of the playground, the age of the target group, budget or color guidelines. Our mission is to bring smiles to all users, including those with special needs. Thanks to integration playgrounds, everyone can experience the joy of play.

Beneficial effect on children

Before designing new equipment, we conduct an in-depth analysis of children's needs, thanks to which playing on our equipment provides children with a lot of positive stimuli. Graphics that arouse joy in children stimulate friendly emotions, eliminating fears and stress, which contributes to building a sense of security and inner peace. The cheerful illustrations created by our artists support the proper development of children's psyche, directly affecting the central nervous system. While playing on the playground, the youngest users gain their first experiences in forming relationships with others, learn to share, wait patiently, deal with emotions and cooperate in a group setting.

Development of imagination

Unique structures and effective design take children to the land of smiles, providing them with an unprecedented range of emotions. Themed designs referring to ships, castles or other interesting places encourage creative play and active spending of time outdoors. All this helps in the development of a child's imagination and social integration.

More and more ideas

We constantly follow the latest trends on the market and analyze the needs of children around the world. Thanks to this, we provide our customers with increasingly innovative solutions, while maintaining the highest quality. Vinci Play is a company of the future, where quality, safety and style combine into one to produce industry leading playgrounds.

Sustainability at Vinci Play

At Vinci Play, we have been ensuring stable and sustainable growth for many years. Operating on a global market, we understand how important it is to be aware when managing our social, environmental and organizational influences. We listen carefully to the opinions of our stakeholders, we look for new solutions every day and never lose sight of what is most important, such as values in business.

Sustainable development is one of the key foundations supporting Vinci Play's business growth strategy. We persist in efforts to ensure that our operational activities support the implementation of the UN Sustainable Development Goals. Our intention is to implement the assumptions of the ESG strategy by 2026, which includes 73 tasks that maximize our positive impact in the value chain. We reflect the global partnership for sustainable development in three pillars of responsibility: towards people, the planet and the community. Each of them pursues specific goals that provide an answer to the expectations of our stakeholders: employees, customers, social and business partners.

We continuously invest in social potential, responsible resource management, and product safety and quality. We develop our portfolio in the spirit of a circular economy, we focus on the development of renewable energy sources and ecological education. We want our products to support the development of social bonds in every corner of the world. We believe in the power of collective partnership, which is why we are an active signatory to real changes in the world, guided by the maxim of "conscious participation in positive transformation for the good of future generations".

For Society

Vinci Play supports social connections and involvement. We intend to develop related projects with ecological education and supporting intergenerational integration and the development of social bonds in the places where we operate. The goals we set for ourselves in this regard include: improving the ESG management structure, raising standards ethics and respect for the rights of stakeholders.

For the Planet

We will intensify actions to mitigate the effects of climate change. We are planning the transformation of our offices and production plants.

We will innovate in terms of designing and expanding the product portfolio focusing on a circular and low emission economy, as well as responsible use of natural resources. The goals we set for ourselves in this plan are, to name a few, measuring carbon footprint emissions, investing in renewable energy, increasing recycling and upcycling of waste.

For the People

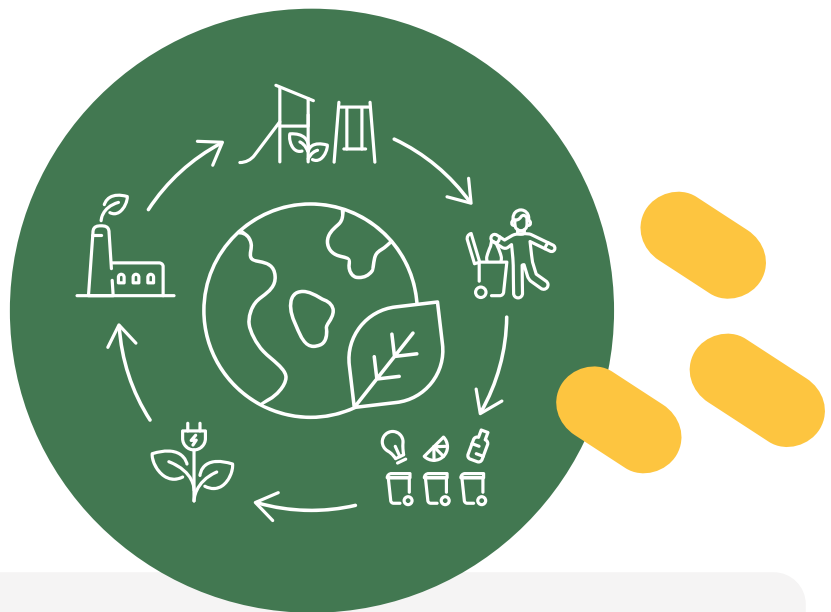

Vinci Play aims to increase its efforts to support development of the company's employee potential. The company intends to implement numerous projects in the field of employee safety and health and diversity management. The goals we set for ourselves in this policy, among others, are: an increase in satisfaction of our employees and establishing partnership cooperation throughout value chain.

The idea of ecological playgrounds

A playground is a place where children can play, develop and learn. Ecological playgrounds use natural materials and sustainable solutions to create a safe and pleasant place for children to play, while taking care of the natural environment.

Green playgrounds are not only a place to play, but also an important element of education and building ecological awareness among children. They are also an example of a responsible approach to the design and construction of public spaces, with respect for the natural environment and well-being of future generations.

Why it is worth creating ecological playgrounds:

Reducing CO2 emissions

The wood we use to produce playgrounds is a more ecological raw material than steel, aluminium or plastic. Using wood in production reduces the climate footprint.

Promoting sustainable development

Children playing on Vinci Play playgrounds learn about environmental protection and responsible use of natural resources.

Improving health and well-being

Contact with nature has a positive effect on children's health and well-being. Through ecological playgrounds, we encourage physical activity and spending time outdoors.

Creating a pleasant place to play

We design playgrounds with aesthetics and functionality in mind, creating a friendly and encouraging environment for play.

Reducing the impact on the environment

In the production process of ecological playgrounds, we use materials from recycled or renewable sources.

Waste minimization

The materials from which we create playgrounds allow them to be reused after use.

Our solutions

Recycled textile composite

Out of concern for the future of children and subsequent generations, the idea was born to replace our classic elements of playground equipment construction with materials from post-consumer recycling. As a result, we created the Recycled series. Composite posts are made entirely of recycled clothing, and at the same time they are durable and aesthetic.

Ocean Waste

Recycled HDPE used in the Recycled product series is based on secondary raw materials. High-quality polyethylene is made from recycled ocean waste. Fishing nets and ropes extracted from the water, properly processed, are a highly durable, environmentally friendly material, resistant to weather conditions: frost, moisture, temperature fluctuations and UV radiation. Used to produce various types of panels, side panels, roofs and other playground components.

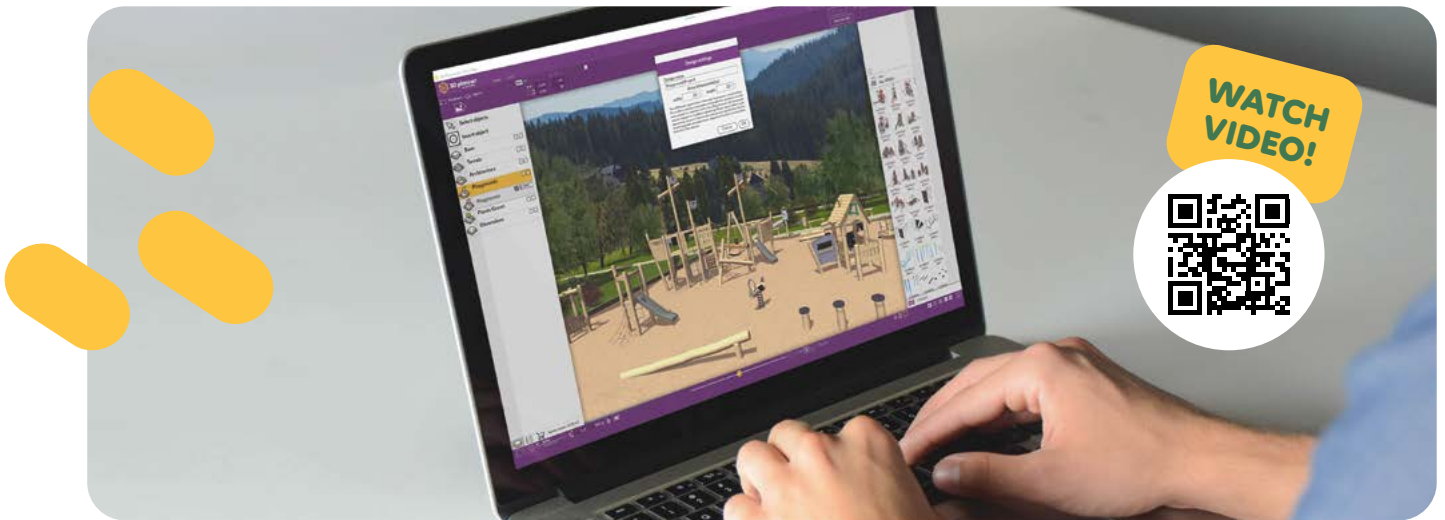

Robinia wood

Robinia series is manufactured from natural black locust wood obtained from European plantations. The acacia wood used in the manufacture of the Robinia range is rich in oils that protect the material from the weather, preserve it in a natural way and protect it from rotting and pests. Our Robinia wood is sourced from FSC® certified European plantations and other controlled sources, enabling us to care for the future in the spirit of sustainable development.

Design under control

Designers and engineers creating playground equipment, with attention to detail, refine each play element so that it meets the individual needs of users. Thanks to personalization, we implement projects tailored to the unique preferences of customers. Each series of products is characterized by a different style and various features of appearance and functionality, which means that our customers can choose from a wide range of items that will perfectly fit into the existing playground environment.

Design your playground

Design a functional and safe playground with the 3D planner application. Thanks to this user-friendly app you will be able to create several versions of the playground and choose the one you like the best in just 5 minutes. Upload a photo of the space you have at your disposal and fill it up with Vinci Play equipment. See what your new playground will look like in the morning, in the evening and during different seasons of the year. You will be able to export the created visualizations to .jpg/.png or .pdf files. Our 3D application will calculate the area needed for the installation of the Vinci Play equipment based on their safety zones, so that your modern playground can meet all the requirements of the EN 1176 standard.

1. How to start?

You can easily name the project, define the size of the area and the shape and size of the playground.

2. Choosing Vinci Play products

You can search for a Vinci Play product by the age of users, product series, materials or colour versions through a quick and intuitive search engine. The application contains an up-to-date library of all devices available in the offer.

3. Adding products, plants and creating a playground of your dreams

Adding equipment or plants is child's play. As soon as you make your choice - just click on the product (or on a plant) and drag it to the selected area. When adding more products, special attention should be paid to ensure that the safety zones of individual elements do not overlap (this is very important!) - when this happens, the contact area will be highlighted in red.

4. Defining surface texture

Each playground also has a surface. Not all devices can be installed on grass or sand. You can easily sketch various shapes on the surface that can be made of flexible poured surfaces. Just choose a defined shape - circle, square or hexagon, or draw an irregular shape by hand. It's very easy! Then you can choose the colour or texture of each element of the surface.

5. Displaying a 3D view and printing

All steps so far have taken place in top view. It's cool, but the visualization of the playground is something that interests us much more. How to show a 3D view? It's also very easy. Just click one button and the newly created playground will show up in all its glory! The view can be zoomed in and out and shown from different angles, thanks to which we can feel as if we were walking on an already existing playground. We can also quickly print a specific view and pass it to the customer along with the offer.

Choose Vinci

**Be closer
to nature
with Vinci Play!**

Robinia, naturally!

The ROBINIA series is an inexhaustible source of inspiration for play for younger and older children. The variety of educational and sensory panels, as well as moving elements, stimulate children's interest and joy.

These wooden and environmentally friendly devices in the ROBINIA series stimulate the comprehensive physical development of children, and allow a large group of them to play at the same time. Thanks to this, children learn to establish relationships with peers and cooperate in a group.

Over 150 playground-equipment, sports, and small architecture products fit perfectly into both the natural landscape and modern architecture.

Robinia wood

The acacia wood used in the manufacture of the Robinia range is rich in oils that protect the material from the weather, preserve it in a natural way and protect it from rotting and pests. Our Robinia wood is sourced from FSC® certified European plantations and other controlled sources, enabling us to care for the future in the spirit of sustainable development.

Safety standards

In order to maintain the unique and irregular nature of the acacia wood, each product is individually prepared in accordance with the safety standards. In the Robinia series, we have developed unique technical solutions ensuring compliance with the EN 1176 safety standard. The products are certified by the international certifying institution TÜV SÜD and TÜV Rheinland. In addition, our production facilities are subject to regular audits by independent certification bodies.

Safe finish

Thanks to the processing of wood by sanding, we smooth its surface, erasing any rough edges or unevenness, so we make the product not only aesthetic but also safe.

Polycarbonate

Our devices are enriched with components made of transparent polycarbonate, which is an excellent alternative to glass. Twice lighter and at the same time two hundred times more resistant to impacts, this material is perfect as a functional and aesthetic detail in devices for playgrounds. Additionally, it is resistant to UV rays, weather conditions and temperatures in a wide range.

Stainless steel

Gutters, troughs and bathtubs made of AISI 304 or AISI 316 stainless steel with a suitably smooth surface finish allow children to play in water and sand. With proper maintenance, stainless steel remains unaffected by weather conditions, which ensures its long service life.

Surface anchoring in Robinia

For most Robinia equipment, anchoring to concrete (K3 surface anchoring) is available, where Robinia logs are put on hot-dip galvanized anchors. This solid solution allows the installation of products of this series in various environments, adapting to various projects.

Quick and easy installation

Before shipment, all products undergo preliminary assembly in our factory to prevent jams. We have developed a special connection system, consisting of appropriate undercutting, specialised fastening, and machining holes in key places. Thanks to the clear instructions and the individual marking of the components, it is possible to install quickly and easily, without specialist knowledge and tools.

Packing and transportation

All elements are manufactured in a way where it is possible to transport both by road (bus, or semi-trailer), sea or air. The appropriate packing of the elements optimises space and transport costs, and facilitates convenient unloading without the need for cranes or specialist equipment.

Robinia

Destination: nature!

The ROBINIA series consists of playground equipment made of natural raw material - Robinia acacia wood, the most durable wood found in Europe. This timber is characterized by natural, bright colours, has high weather resistance, does not require impregnation and can be anchored directly in the ground.

The unique Robinia series has been designed in a comprehensive way to enable creating of an offer containing all types of playground equipment: from tower sets with many climbing elements, through spring riders, carousels and swings, to small architecture.

Let's create a dog zone!

The WOOF series consists of devices for dogs, which allow them to develop and facilitate socialization with other furry friends.

These devices are ideal for starting agility training with your pet. Activity on devices from the WOOF series engages the dog both physically and mentally, contributing to improving its agility and coordination. Our products for dogs significantly affect their quality of life, while enriching urban infrastructure.

Recycled, a better way!

Caring for the future of children and future generations, the idea was born to replace our classic elements of play equipment construction with post-consumer recycled materials. As a result, we have created a group of Recycled products made from 100% recyclable materials that lower carbon emission.

Towers, slides, ladders, sandboxes, educational panels, spring rockers, swings and complementary elements, such as benches and litter bins – all produced with the use of recyclable materials.

Recycled series

Let's play in the sky!

Tall conical and cubic towers reaching to the sky are a paradise for children. Made of the highest quality materials, with a beautiful design, enriched with educational elements and musical panels, as well as stainless steel tube slides. Thanks to the modular system, these towers can be a whole playground itself, or be its main advantage.

Find out more on www.vinci-play.com/en/playground-equipment/maxx

Watch movie:

MAXX series

jungle

Wild adventure!

The JUNGLE series will allow you to climb to the heights and conquer the unconquered.

The best adventures will feel like they are happening right between the crowns of trees! Among green leaves, branches and colourful graphics, children can turn into adventurers and explorers.

High tube slides are fun - not only for small kids. The climbing elements are a challenge and encouragement to be active.

Find out more on www.vinci-play.com/en/playground-equipment/jungle

space

Explore the universe!

The SPACE series is a fulfillment of childhood dreams of space travel.

The towers, standing up to 9.5 meters high and resembling space rockets, will lift children high above the ground. Colourful graphics, lots of activity and play elements, including tube slides made of the highest quality stainless steel, will not let anyone get bored.

Find out more on www.vinci-play.com/en/playground-equipment/space

castillo

Play a role in a castle theme!

Breathtaking castles, monumental towers, passages and hiding places made of rope elements, tube slides... And much more! Each child will be able to feel the atmosphere of medieval times, turn into knights and princesses, fight dragons, and lock the wicked in dungeons.

Castillo towers made of the highest quality materials guarantee entertainment for users of all ages.

Find out more on www.vinci-play.com/en/playground-equipment/castillo

steel+

SEE VINCI PLAY
CATALOGUE

Simple fun!

The STEEL+ series comprises modern tower structures with many features that will delight both younger and older children. Colourful towers enriched with musical elements are just the perfect place to have some fun with fellow companions and are also a great spot for relaxation.

A vast variety of devices with educational elements facilitate the integration of children of all fitness levels.

Find out more on www.vinci-play.com/en/playground-equipment/steel-048

topicco

Play a role!

A series of role-playing devices: a train station, a fire station, a fire truck, a lighthouse, a ship, a truck or a roller. These devices help release child's natural tendency to play happily and learn the „adult world“, as well as engage in teamwork.

The TOPICCO series offers a number of elements such as educational panels or manual elements that stimulate motor skills and positively affect the intellectual development of young children.

Find out more on www.vinci-play.com/en/playground-equipment/topicco

wooden

Equipment from painted wood

The WOODEN series is an endless source of inspiration for how to have fun, for both younger and older children.

Various educational and sensory panels, coupled with moving elements, will bring children lots of joy and draw a lot of interest.

The environmentally friendly wooden equipment from this series stimulates child's comprehensive physical development and allows a large group of children to play together at the same time. Thanks to this, they learn how to establish relationships with their peers and how to work as part of a team.

Find out more on www.vinci-play.com/en/playground-equipment/wooden

minisweet

Colourful series for the youngest

The MINISWEET series consists of playground equipment designed for the youngest children and preschoolers.

Friendly houses, tunnels and slides are an ideal place to have fun together. This is also where the child learns the principles of functioning in a group while perfecting its language skills.

Minisweet devices encourage children to exercise and support the development of key mobility aptitudes. They allow every toddler to enjoy joyful and carefree fun.

Find out more on www.vinci-play.com/en/playground-equipment/minisweet

steel

Classic tower sets

The STEEL series consists of classic structures that offer unlimited fun for older children. The sets of equipment from this series can be perfectly adapted to the needs of children and the available space.

Rows of towers connected by various attractive movable elements make for a great training ground for motor coordination.

They allow a large group of children to play together at the same time, which helps to establish relationships and learn teamwork, as well as healthy competition.

Find out more on www.vinci-play.com/en/playground-equipment/steel

crooc

Unique houses

The CROOC series is all about beautiful, unique designs, vibrant colours and multi-tower playground sets that allow large group to have fun together.

Fairytale houses encourage children to engage in role-playing activities with their fellows. Element merging platforms, ladders, climbing walls and slides of different difficulty levels comprehensively stimulate the proper motor development of each child.

This series guarantees that the child's energy is channeled effectively.

Find out more on www.vinci-play.com/en/playground-equipment/crooc

solo.

Fun for youngsters!

The SOLO series is a paradise for preschoolers, which is ruled by sand, water, sound and movement.

Free fun develops natural creativity of the child, encourages to do experiments and triggers the desire to cooperate with other children.

The richness of colours, manual and sound elements, along with educational panels comprehensively stimulate the senses and the intellectual development of children.

Find out more on www.vinci-play.com/en/playground-equipment/solo

spring

Rocking and swaying

The SPRING series equals pure energy on springs. It satisfies child's natural need for unrestrained and carefree swinging.

Colourful vehicles and happy animals encourage kids to jump energetically and sway in the rhythm of body movements.

The spring riders, which are so beloved by children, allow for joyful fun which also carries great benefits for kids' development.

Find out more on www.vinci-play.com/en/playground-equipment/spring

swing

Swinging in full swing!

The SWING series includes classic equipment beloved by younger and older children.

Colourful single swings, see-saw swings, multi-swings with bird's nest seats and weight-balanced multi-swings offer a pleasant thrill for children and encourage them to play with their friends.

Rhythmic swing movement is an effective body balancing exercise that has a positive effect on the development of the muscular and nervous system.

Find out more on www.vinci-play.com/en/playground-equipment/swing

hoop

Spin, spin!

The HOOP series consists of roundabouts and spinners that make the world go round with laughing children.

Spinning is an important activity for children's development as it promotes the maturation of the nervous system, stimulates the sense of balance and strengthens the muscles and skeletal system. At the same time it is a source of exciting sensations. For an older child, it is often a favourite place of crazy fun with friends.

Colourful carousels encourage both younger and older children to have fun together.

Find out more on www.vinci-play.com/en/playground-equipment/hoop

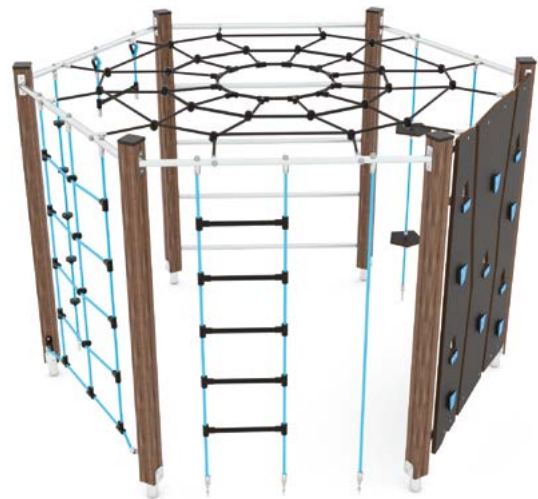

climbo

Climb, crawl and pull-up

The CLIMBOO series comprises equipment that develops the fitness and coordination of older children, increasing their faith in their own abilities. Various climbing ladders and walls with a varying level of difficulty strengthen the muscles and teach children to concentrate and maintain balance.

This series is the perfect place to organise competitive games where exciting physical challenges are coupled with maximum safety.

Find out more on www.vinci-play.com/en/playground-equipment/climboo

nettix

Ropes, ladders and spinners

The NETTIX series comprises modern equipment in the form of ladders and rope crossings, which constitute a combination of carefree fun and effective fitness training.

Rope climbing stimulates the sense of balance, strengthens the muscles and improves the child's dexterity. It also encourages children to compete with each other.

This series is a creative adventure among ropes, where the boundaries are set only by the children's imagination.

Find out more on www.vinci-play.com/en/playground-equipment/nettix

arena

Be like Lewy!

The ARENA is a multifunctional playing field that can be an independent sports facility, perfectly suited for public spaces. In the Arena you can play football, basketball, handball, hockey, tennis and many more.

The highest quality construction and materials are resistant to the loads associated with the use of the field. Thanks to the modularity of the size and functional design, as well as the possibility to choose the material and colour version, the Arena can be adapted to individual needs.

Find out more on www.vinci-play.com/en/playground-equipment/arena-fe8

**MODULAR
SYSTEM**

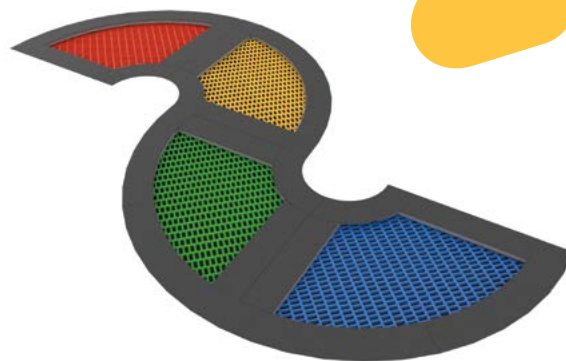

jumpoo

Jump to the sky!

Jumping on the trampolines is a great fun, but also a great training! It allows children to strengthen their muscles, improve fitness and coordination, and at the same time reduce stress and tension, enabling them to relax.

Our trampolines are available in various colours and thanks to the special structure of the elements, any combination of shapes.

Find out more on www.vinci-play.com/en/playground-equipment/jumpoo-f94

fitness

Keeping fit!

The FITNESS series was created with wellness in mind, encouraging to train and lead a healthy lifestyle.

The series devices are available in several colour and material options, which allows to create a professional outdoor gym responding to various needs.

Find out more on www.vinci-play.com/en/playground-equipment/fitness

active

Stay healthy!

Especially for seniors, we have prepared devices that help maintain or restore proper body movement. Keeping in good shape through activity is a very important issue, thanks to which the elderly can enjoy health even longer.

Find out more on www.vinci-play.com/en/playground-equipment/active

workout

As fit as a fiddle!

The WORKOUT series designed for development, keeping fit and returning to good physical condition. It consists of steel and wooden structures with many bars and elements for training with the weight of your own body. Modern design, durable materials and colour options, perfect for creating a contemporary sports ground.

Find out more on www.vinci-play.com/en/playground-equipment/workout

workout pro

Effective and professional training

The WORKOUT PRO series is an advanced equipment designed to create professional training environments, ideal for competitive and professional athletes.

Each device is designed to provide the tools for effective and intensive exercises.

The structures included in the series are characterized by solidity, durability and austere design, which increases functionality and comfort of use.

Find out more on www.vinci-play.com/en/playground-equipment/workout-pro

New series!

-park-

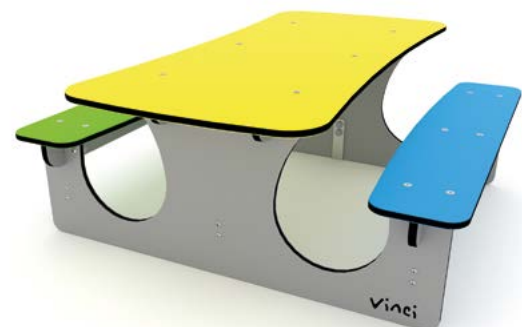

Small park architecture

The PARK series is a necessary complement to a child-friendly playground.

Comfortable benches and tables, colourful litter bins, information boards and fences – all these elements ensure comfortable relaxation for children, their parents and caregivers.

The modern and aesthetically pleasing design of street furniture harmoniously blends in with the playground equipment.

Find out more on www.vinci-play.com/en/playground-equipment/park
